## MAS 500

### WEB-BASED REPORTING

All Advanced Planning and Scheduling reports can be generated and viewed through Microsoft Internet Explorer with our Web Reports module, at the same high level of security as with the module's standard output.

### REPORTING FEATURES

- Maintain custom form layouts for printed forms used throughout all MAS 500 modules.
- Tailor forms to your organization's design requirements.
- Export all report data to an external file. Data types supported include ASCII text, delimited, Excel, Lotus 1-2-3, HTML, RTF, or Microsoft Word.
- Output any report to the screen, a printer or a variety of file formats.
- Create customized, presentation-quality reports through Crystal Reports software.

- Tool List
- Work Center Schedule List
- Machine Schedule List
- Holiday Schedule List

### MAS 500 SOLUTIONS

- CRM and E-business
- Financials and Project Accounting
- Distribution and Manufacturing
- Human Resources and Payroll
- Customization

## ADVANCED PLANNING AND SCHEDULING

### Manage Production Using Advanced Scheduling Rules and the Simple Drag-and-Drop Schedule Board

Do you have problems scheduling production? Are orders late because someone forgot to schedule an operation? Did you ever lose a good customer because production fell behind their required deadline?

MAS 500 includes one of the most powerful and easy-to-use Advanced Planning and Scheduling (APS) systems available today. This module uses industry-standard scheduling rules to automatically schedule production based on advanced algorithms and mathematical calculations.

System-generated schedules provide a great foundation but do not take into consideration real-world concerns. That's why MAS 500 includes a drag-and-drop schedule board.

The schedule board displays all system-generated operation schedules, and it allows supervisors or production scheduling personnel to tweak the schedule to fit in high priority orders or to move scheduled operations to a different machine when another breaks down.

MAS 500 provides company-wide visibility for production schedules. Your customer service, management, sales, and other employees have online access to view the status of each customer order. Best Software provides customer service with tools to quickly find scheduled completion dates across manufacturing facilities.
