## MAS 500

### WEB-BASED REPORTING

All Project Management reports can be generated and viewed through Microsoft Internet Explorer with our Web Reports module, at the same high level of security as with the module's standard output.

### REPORTING FEATURES

- MAS 500 lets you tailor Project Management output forms to your organization's design requirements.
- Export all report data to an external file. Data types supported include ASCII text, delimited, Excel, Lotus 1-2-3, HTML, RTF, or Microsoft Word.
- Create customized presentation-quality reports with Crystal Reports software.

### REPORTS

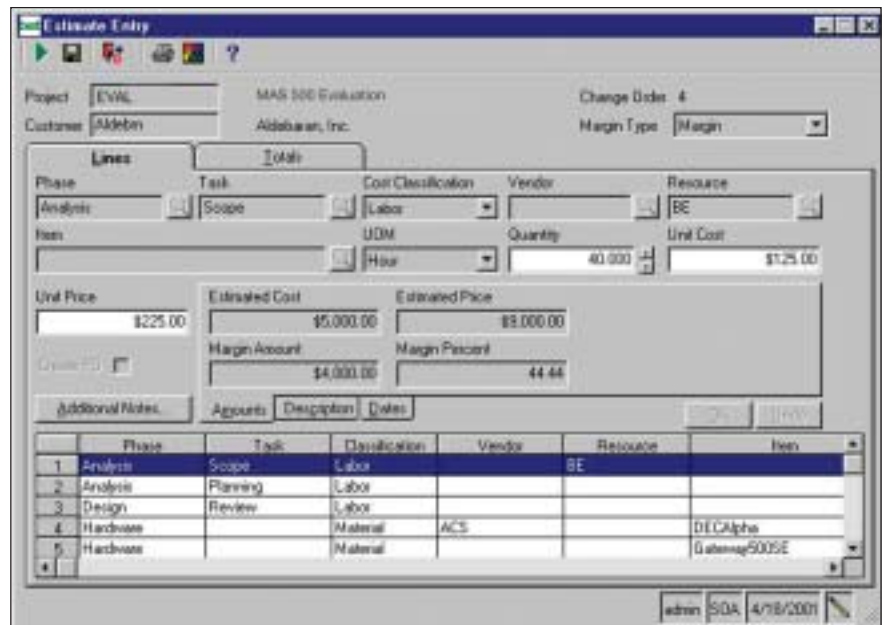

- Project Transaction Ledger
- Project Summary
- Committed Costs
- Inventory Transaction
- Project Profit and Loss
- Project Forecast Estimate
- Work In Progress
- Resource Utilization/Realization
- Timesheet and Expense Approval
- Project Chargeability
- Profit History

### MAS 500 SOLUTIONS

- CRM and E-business
- Financials and Project Accounting
- Distribution and Manufacturing
- Human Resources and Payroll
- Customization

## PROJECT MANAGEMENT FOR MANUFACTURERS

### Profitably Manage All Aspects of Your Design, Manufacturing, Service and Installation Projects

Do you manage engineering or prototype production projects? Do you install or service the products you manufacture? If so, the MAS 500 Project Management solution can keep all of your project managers informed and equip them with the tools they need to profitably manage these projects.

By implementing this robust solution, you will enable your project managers to easily assign resources to projects, track actual versus estimated costs through project completion, and generate detailed estimates for customers. Projects can be based on a fixed price, by accounting for time and materials, or a combination of both options. Moreover, Project Management can be integrated with Microsoft Project, so you can leverage the strengths of both products to gain a comprehensive tool for managing all tasks, resources and schedules.

Another Project Management feature that is particularly important to manufacturers is the ability to manage a wide variety of project types. This flexibility can significantly decrease project management costs by eliminating the need for multiple project tracking systems. In addition, the six GAAP-compliant profit recognition methods enable you to control profit recognized over each period, resulting in a well-managed revenue stream.

Beyond its ability to manage manufacturing projects, Project Management also boasts a series of tools designed for businesses that install or service products. Time and materials can be instantly expensed throughout the installation or service processes. And eTimesheets, a browser based module, can be implemented to facilitate remote viewing and updating of a project's status.
